DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b); by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Cox (US 5,848,155).

Claim 1:

Cox discloses:

“obtaining digital data of a transformed representation of the image”, see Fig. 6 items 68, 70 where digital data of a transformed representation of the image is obtained as claimed;

“determining a transformed representation of the watermark for optimized visibility of the watermark in the image”, see Fig. 6 items 60-66 which is a transform representation of the watermark as claimed;

“and superposing the transformed representation of the watermark on the transformed representation of the image”, see Fig. 6 item 72 where superposing occurred as claimed.

Claim 3 is disclosed, see col. 3 line 13.

Claims 4, 5 are inherent to Cox's disclosure.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cox (US 5,848,155).

Cox does not explicitly disclose that the transformed representation of the image is a compressed representation as claimed in claim 2. However, compression is very well known coding technique in the art that would reduce transmission or storage requirements; thus, an artisan would be motivated to implement this technique in Cox's system, because this implementation would reduce transmission or storage requirements. Therefore, the claimed invention would have been obvious to a person of ordinary skill in the art at the time the invention was made.

Response to Arguments

5. Applicant's arguments have been fully considered but are moot in view of the new grounds of rejection presented above.
